SYLLABUS

In the world of electronics, power supply plays an essential role, it provides the necessary

power for electronic devices to function correctly. The power supply can either be regulated

or unregulated. Both regulated and unregulated power supply has their advantages and

disadvantages, and it's essential to understand the difference between them to make an

informed decision on which type of power supply to use. In the present value-added program

go through a well-defined syllabus as follows

1. Introduction of the resistor, capacitor, Diodes, Transistor, Integrated carcuits(ICs)

Transformer, printed circuit board

2. Unregulated Power Supply-Regulated Power Supply, Steady and Pulsating DC Voltages

Rectifiers Half-wave Rectifier, Full-wave Rectifier-Full-wave Bridge Rectifier, Filters, Series

KAMLA NEHRU MAHAVIDYALAYA NAGPUR DEPARTMENT OF PHYSICS VALUE ADDED PROGRAM (2022-2023)

Introduction:

Incorporating value-added courses should focus on utilizing the skills and creativity of aspiri ng professionals to meet the demands of today's dynamic business environment, making the student more prepared for the workplace. The value-added programs support students' academic progress and help them get ready for the difficulties of the working world. Through a wicle variety of course options, these programs give students the opportunity to improve their innovative and creative abilities as well as gain a more holistic perspective and a greater awareness of contemporary industrial concerns. Department of Physics, Kamla Nehru Mahaavidyalayaintroducing value-added certificate courses for post-graduates students from 1st to 30th September 2022 in "Designing regulated and un-regulated Power Supply".

Aim of the course- The course will enable students to develop compelling insight into selfmanægement and leadership skills in personal and professional efficiency.

Objectives of the value-added course- The students will be able to

- U nderstand the application of administration principles in personal and professional life.
- G≅in clarity about self-motivation and self Confidence
- Utinderstand moral values like honesty ,commitment and dedication
- 4. Pl-an goals, manage time manage and build confidence

Bri ef Report

The value-added certificate course on 'Designing regulated and un-regulated Power Sup-ply'was organized for P.G. students for one month (1st Sept - 30th Sept 2023). Mrs. Vandana R. Kharabe was the coordinator of the value-added program. Mr. S.M. Suryawanshiexplainsa brie f theory of various electronic and electrical components useful in the construction of power supply. Mrs. A.N. Banabakode explains the Series and parallel circuit combinations and their application. Dr. P.A. Zingare elaborates steps to designing a regulated power supply including which components should be chosen to have the required regulated output voltage with required current. The procedure requires calculations based on some designing equations, some assumptions, and approximations that must take during designing explained by Mrs. A.N. Banabakode.

Principal
Kamla Nehru Mahawidy
Sakkardara Chovir

Expected Outcome:

- a. All the PG students successfully design regulated and Unregulated power supplies.
- b. Students are able to comprehend issues with the power supply circuit and can fix them on their own.
